Student Home Digital Citizenship Agreement

You do not need to sign this document and return to school - this is a guide to support you at home.

When using ICT (Information, Communications, and Technology) at home I will always be a good digital citizen. This means that:

1. I will always ask mum/dad/grandparent before I use any technology, whether it is my own or a shared device.
2. I understand where I am allowed to access technology **[type of device]** _____ in these places _____
3. I will always use technology to communicate with others in positive and meaningful ways. Before I post, share, or communicate I will always ask:
 - IS IT SAFE? IS IT TRUE? IS IT NECESSARY? IS IT KIND?

If I answer 'NO' to any of these questions, I will NOT post, share, or communicate.

4. I can build trust while using digital devices by:
 - Only going onto sites that have been agreed on with my family
 - _____
 - _____

These will include the Learning Platforms **[name platforms]** provided by my teacher and may also include **[insert initiatives]** provided by the school.

- Being clear about expectations around active use - the time we spend online for our learning
 - Only using my school email account that was assigned to email my teacher.
 - Turning off or taking a break from the device when I'm told.
 - Charging and storing the device in a safe and agreed area.
5. If I see or hear about something online that is harmful or dangerous, I will let my mum/dad/grandparent know. This person/people may decide to contact my school or [Netsafe](#) for support.
